

Play continues around the table until two of these conditions are met:

- The last Town Card is purchased
- The last Railroad is auctioned
- The last Building is purchased

Once two of these occurs, finish the current round until all players who have not yet taken their turn have done so. (Note: The last player in every game is the player to the right of the 'Starting Player' who went first at the beginning of the game.) Then the game ends.

#### INFORMATION

During the game, all cards and building tiles owned by the players must be placed so that all players may see them (public information). Each player's money, on the other hand, is secret, and does not have to be shared.
